The Power of Networking to Transform the Future of Business

Hossein Eslambolchi, PhD.

President -- Global Networking Technology Services

President -- AT&T Labs

AT&T CTO & CIO

AT&T Fellow

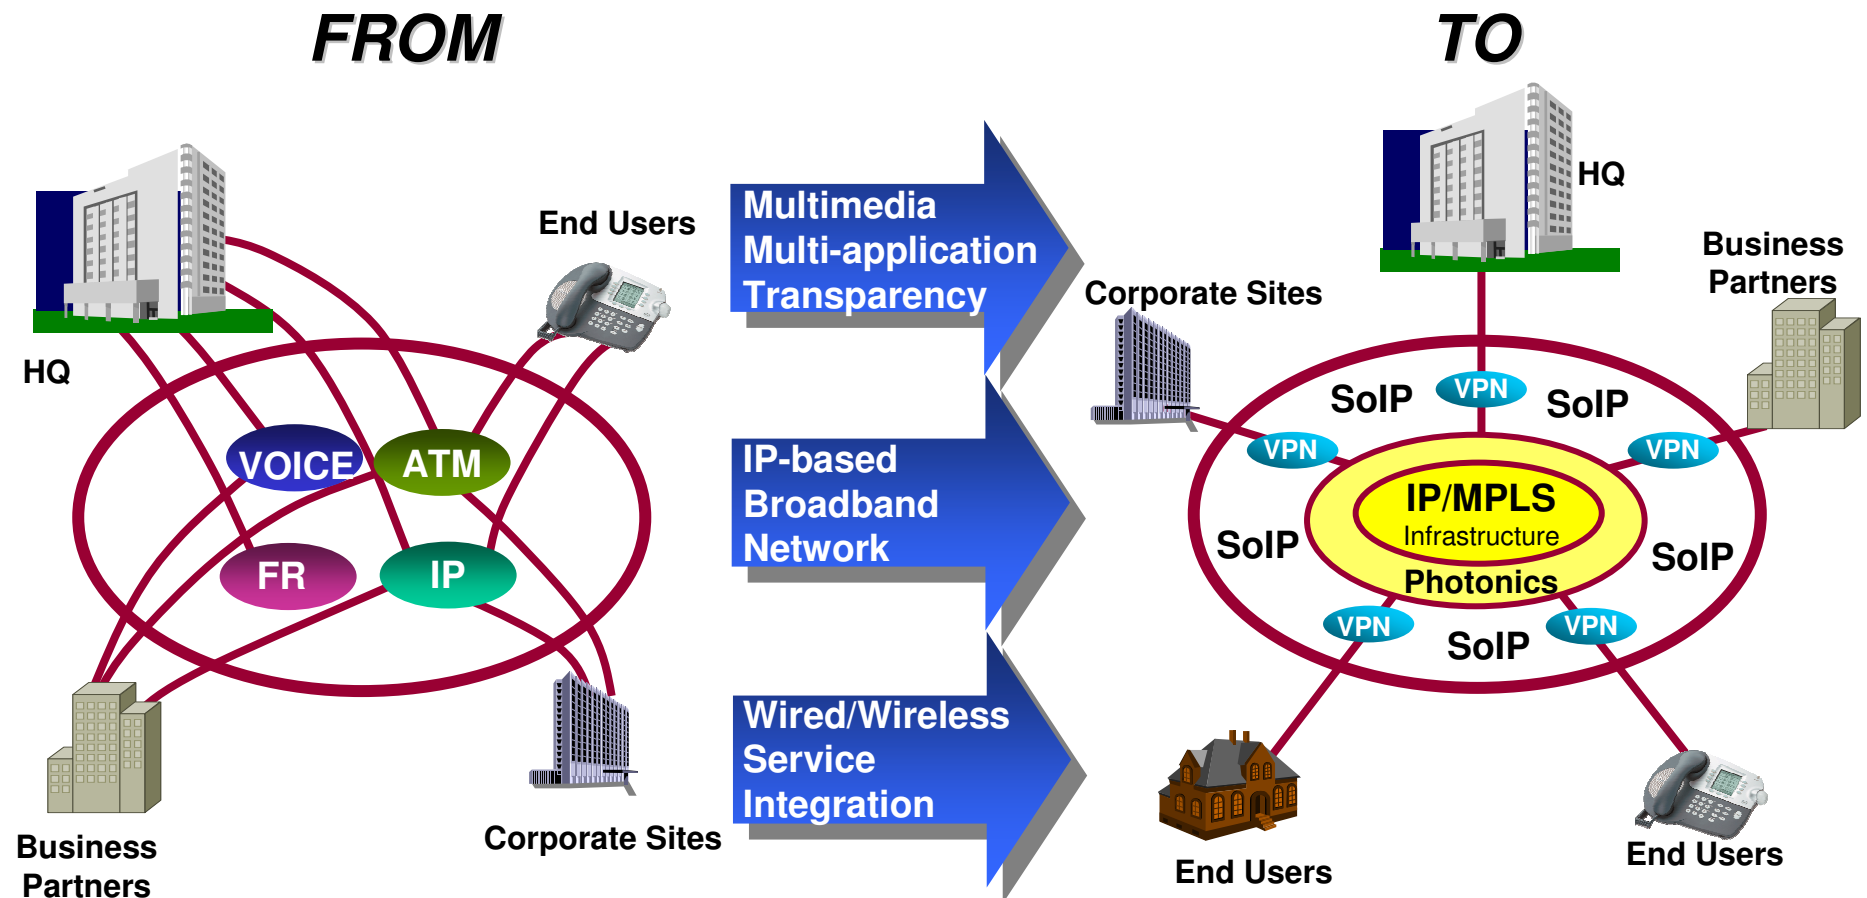

The world's networking company SM

Top Ten Technology Trends

- 1. IP Will Eat Everything!**
- 2. Security Is Critical**
- 3. Convergence of Communications & Applications Will Be A Reality – Network Will Be The Computer**
- 4. Wireless Internet Will Be Big – Driving Mobility**
- 5. Sensor Networks Will Be Everywhere**
- 6. e-Collaboration Will Dominate The Workplace – next generation speech recognition**
- 7. Broadband Will Be Common – Death of Locality**
- 8. Wireless & Wired Lines Will Converge – Accelerating Virtualization**
- 9. Knowledge Mining Will Transform the Way We Do Business**
- 10. Home LANs Will Proliferate**

Power of Convergence

IP Network Convergence: Delivers The Flexibility & Integration To Serve Users Better

Access Challenge

**CUSTOMERS
WANT**

- Choices – other than the ILEC.
- Cost effective access diversity for mission critical applications.
- More bandwidth.
- Shorter access installation intervals
- More reliable and secure access

The Key To Networking Is Distribution

Pipe & Point

- Most of the Cost
- Least Bandwidth
- Least Competition
- Best Ability to Differentiate Yourself from Competitors

WiMax: A Next Generation Access Technology

WiMax is:

- Worldwide Interoperability of Radio Access
- An air interface standard (IEEE 802.16)
- Wireless Metropolitan Area Network (MAN)
- Ethernet “over the air”
- An alternative to ~T1/DSL/cable wireline access
- A global standard

WiMax Technology is:

Expected Advantages of WiMax access:

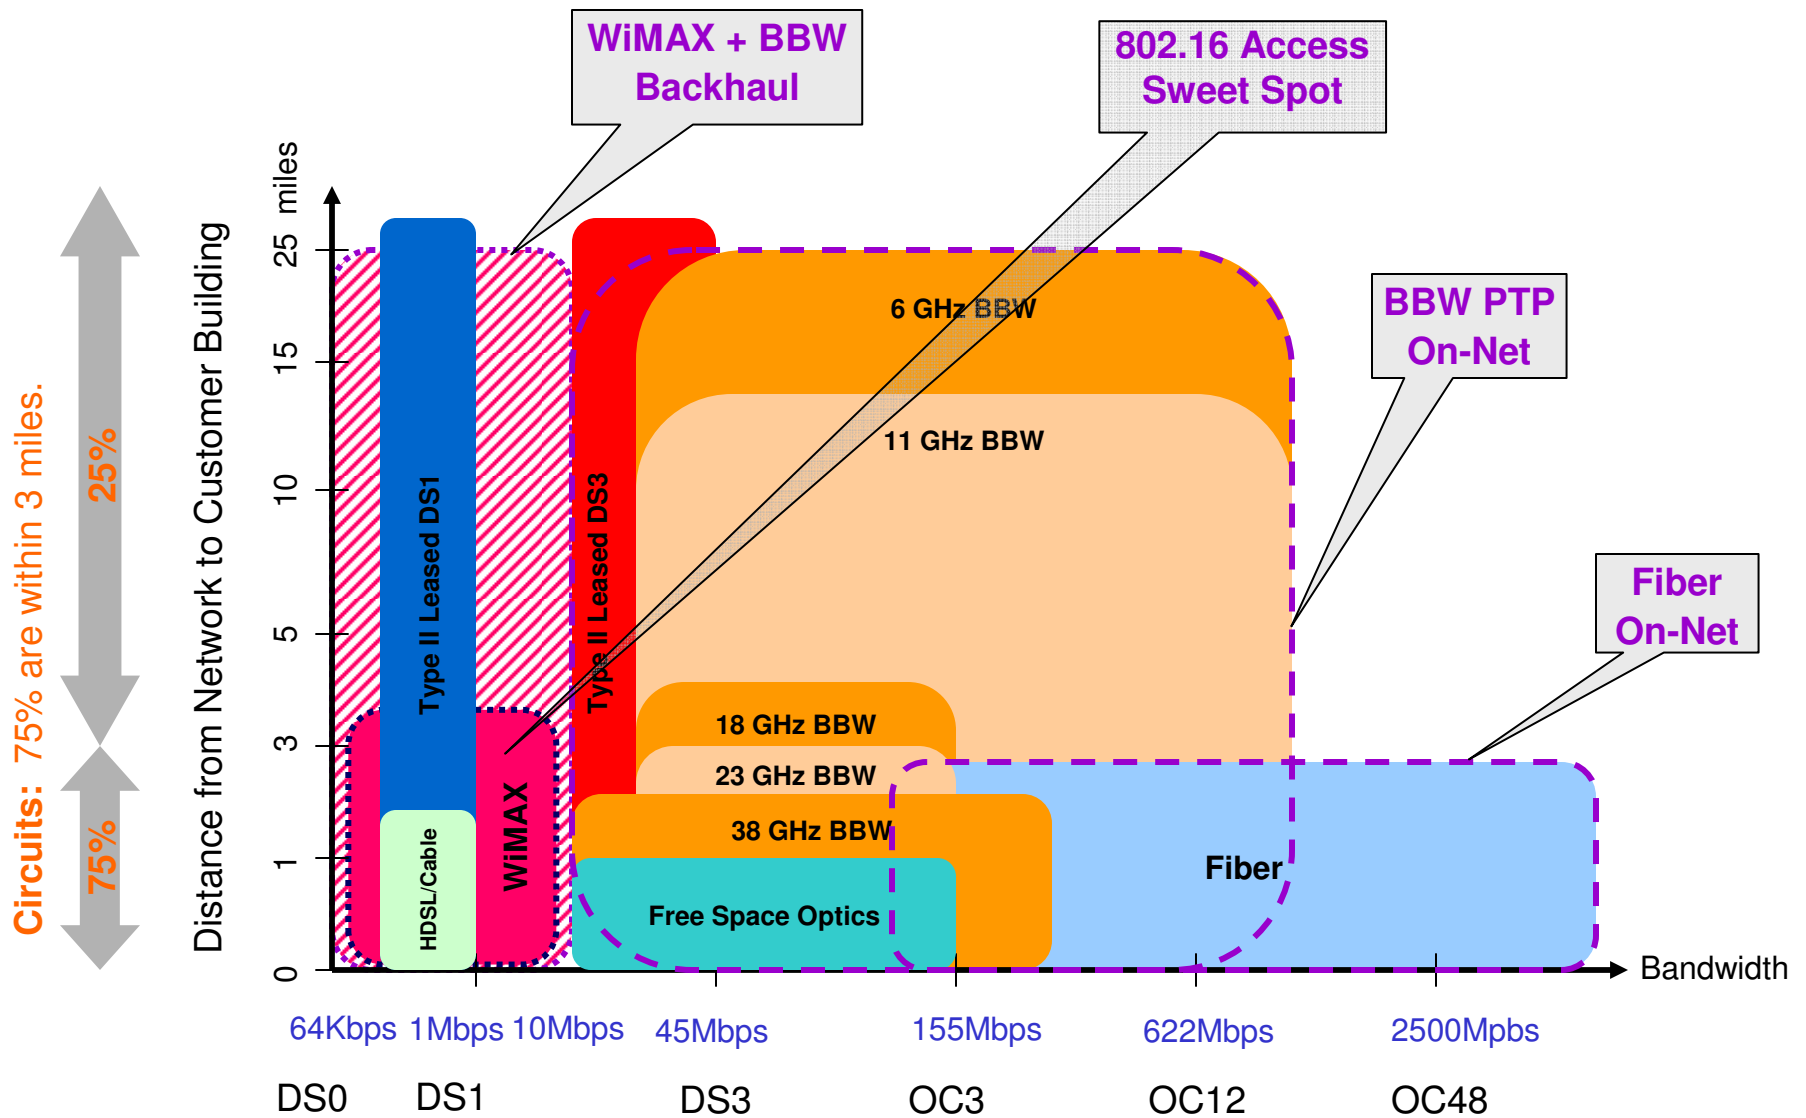

- **Cost effective**
- **Fast Provisioning**
- Customer preferred interface – **Ethernet**
- Higher **reliability** than T1 access circuits
- Provides **resilient, portable & mobile services**

Visualizing a WiMax Network

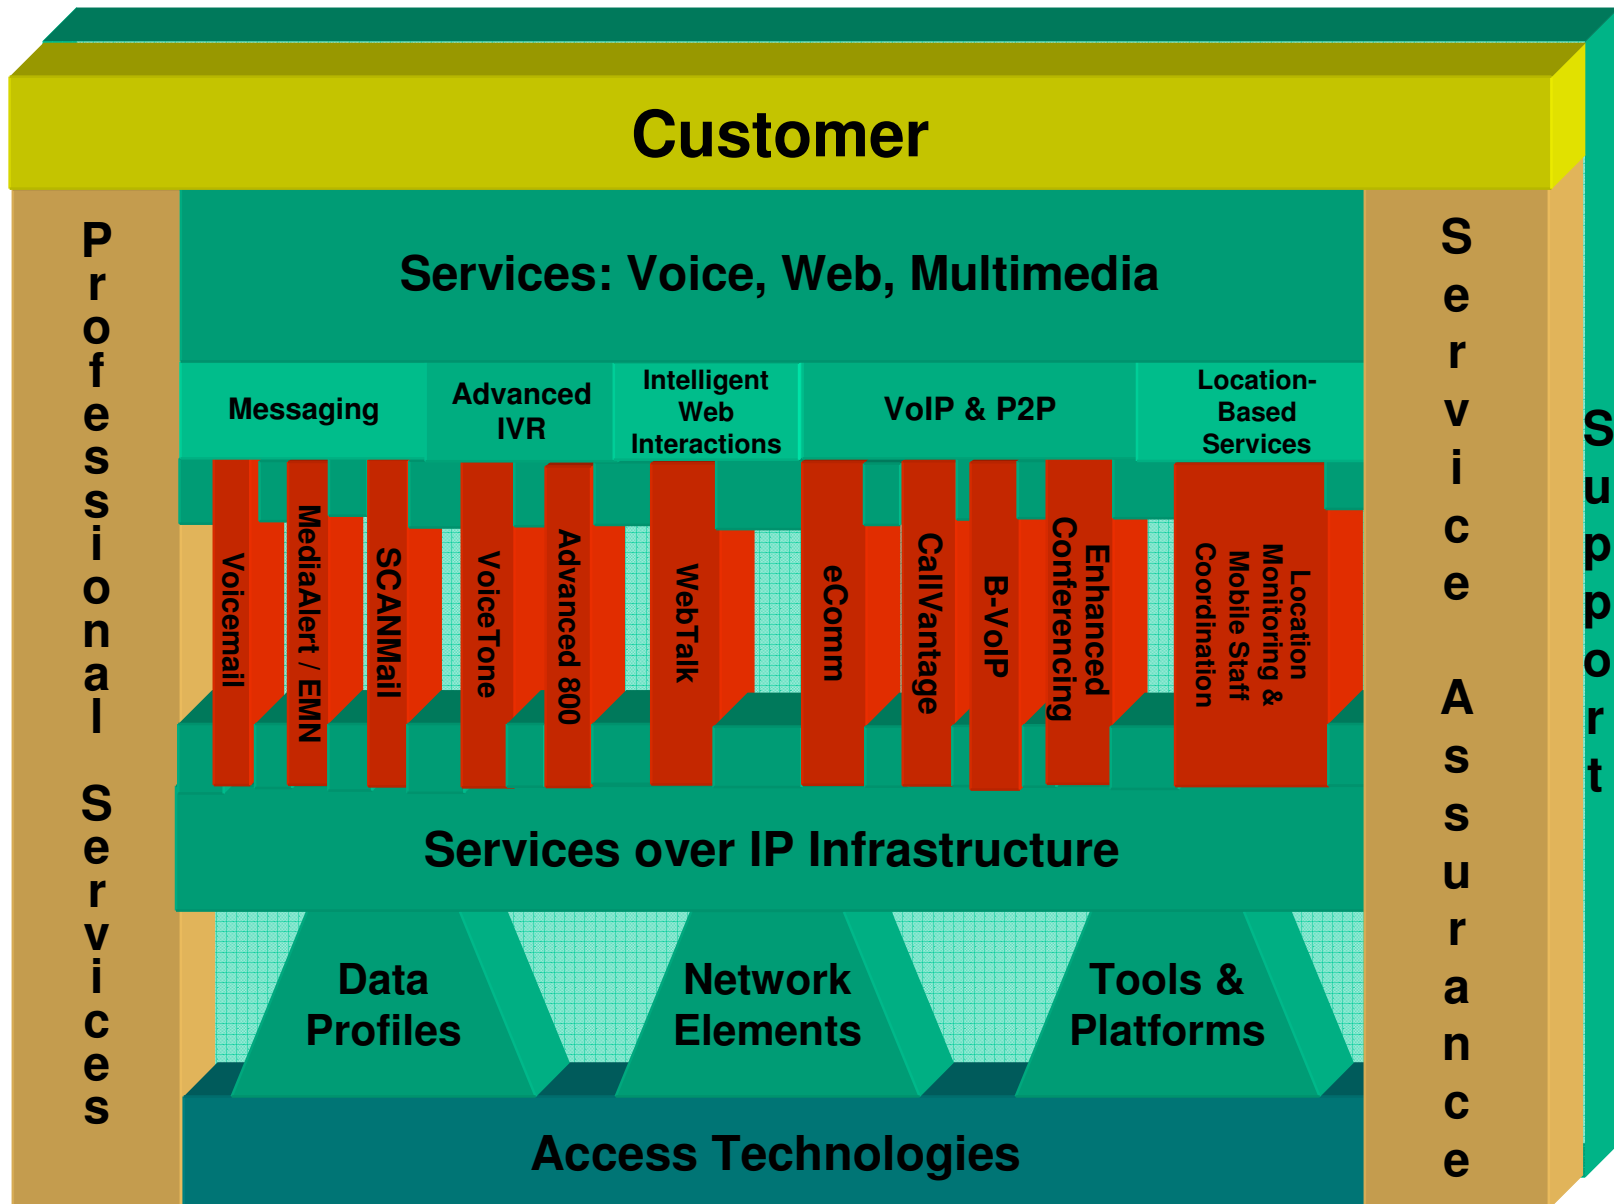

WiMax Links are shown in yellow, typically 1-5 Miles

Multimedia Information Indexing

MIRACLE – A platform aimed at creating the technologies for automated and content-based indexing of multimedia information for intelligent, selective, and efficient retrieval and browsing using IP technology

MIRACLE: Multimedia **I**nformation **R**etrieval by **C**ontent
- Bringing all the technologies together

Technologies: Real-Time Automatic Speech Recognition

- Enables automatic indexing of spoken communications
- Features:
 - Large Vocabulary (210,000 words)
 - Real-Time Response
 - Low Latency
 - High Word Accuracy

Enhanced Conferencing

The screenshot displays the AT&T E*Communications Meetings web interface. At the top, the AT&T logo and 'E*Communications Meetings' header are visible. Below the header, a navigation bar includes links for Home, Meetings, Help, Logout, Meeting Place, Change Meeting, Delete Meeting, Meeting Summary, Participants, and Secure PINs. The main content area shows a meeting titled 'Meeting: Pitney Bowes' with a status of 'In Progress'. Key details include Host: Gerald Karam, Host PIN: 282989, Bridge #: (999) 555-2400, Part. PIN: 263072, Date/Time: 08/19/04 10:54 AM EDT, and Duration: 0 hrs 20 mins. A 'Conference Recorder' section shows 'Recording...' with 'Record' and 'Pause' buttons. A 'Call Control' section for the host includes buttons for HOLD, MUTE, HANG UP, LOCK MEETING, and END MEETING. A 'Participant List' shows members Gerald Karam and Karrie Hanson. A 'Meeting Documents' section lists 'Shared Meeting Documents' and 'My Documents'. A 'Touch Tone Help' section provides instructions for phone controls. A 'Recorded Conference Search and Playback' window is overlaid, showing a search for 'protocol' with results and a playback timeline.

Recorded Conference Search and Playback - Microsoft Internet Explorer provided by ...
Recorded Conference Search and Playback
Meeting: Application Building
Search for a term in this conference recording: protocol
... or click on one from this list: registry, implementation, external architecture, protocol, application, budget, description, dynamic
... or click on the play button to listen to the entire conference.
0 39:26 1:00:29 hour:min:sec
Play Stop Speed
Selected Term: protocol (3 hits)
1) 00:31:10 actually run across any network protocol oh we feel that most
2) 00:37:22 running all of the access protocol is usually almost always going
3) 00:47:19 as the at the uh protocol us is a higher level

■ VOIP conferencing is AT&T's new enabler for powerful new conferencing features

- Meeting recording
- Multi-meeting support
- SpeechLogger keyword search
- Email/IM notification
- Meeting Security

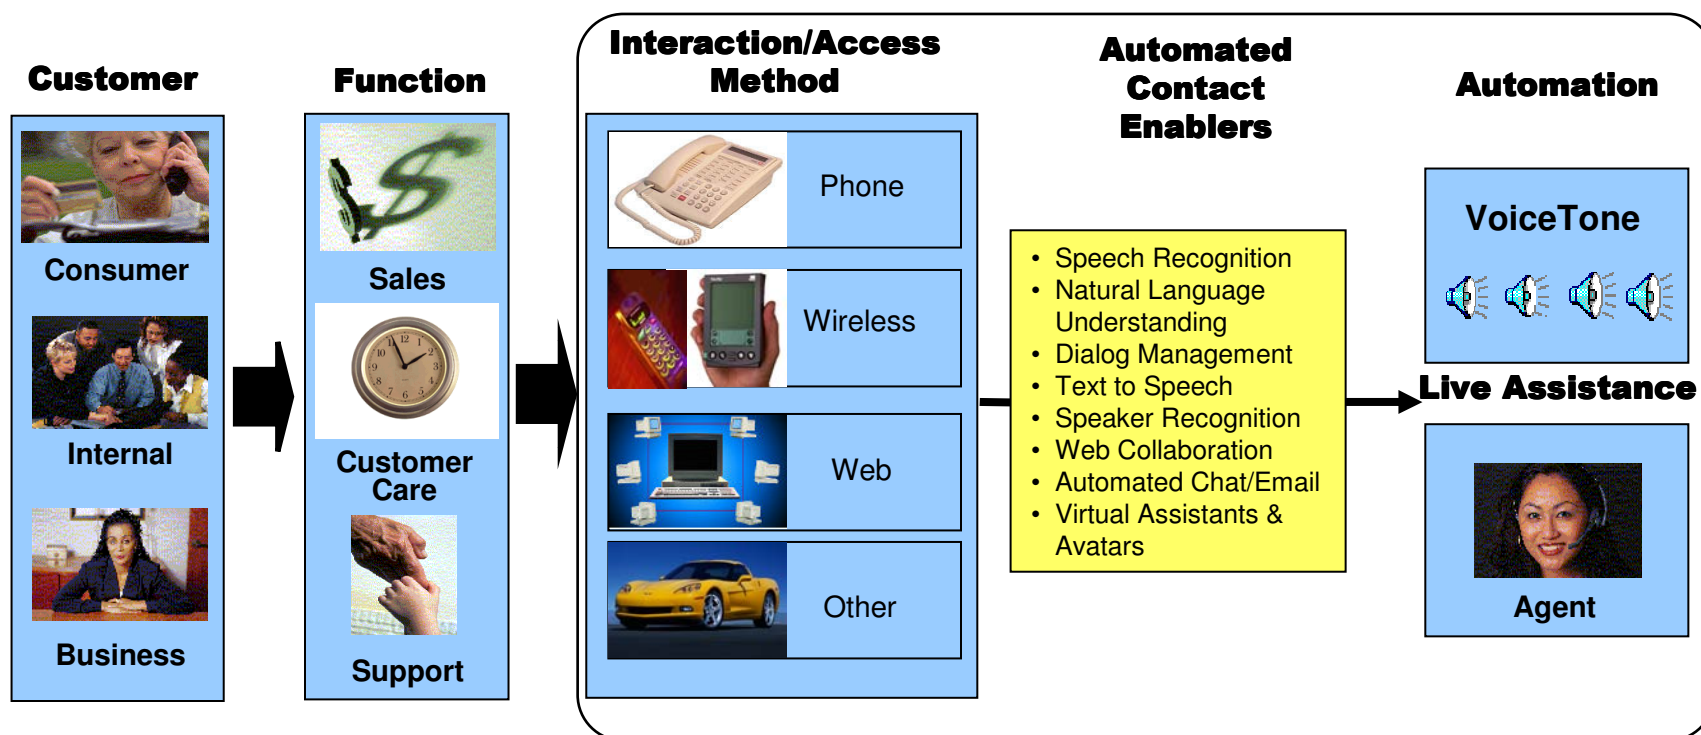

SpeechLogger™ is used to manage conference recording and searching

**Automatic spoken dialog system
building based on a set of Web pages**

Multimedia / Multimodal Contact Centers

Natural Language Understanding Provides A Cost Effective Alternative for Contact Center While At The Same Time Preserving the Customer Experience

Consistently personalized and natural customer experience, regardless of the interaction channel chosen by the customer.

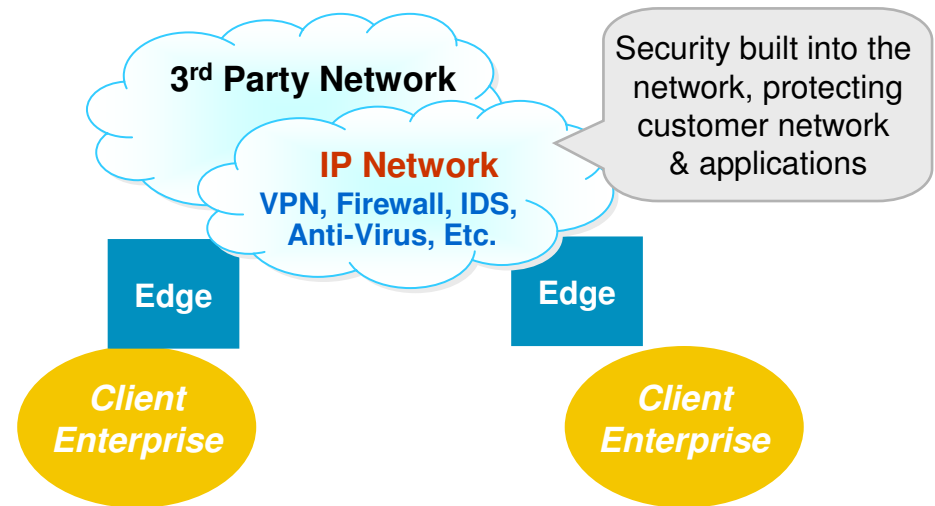

Network Based Security

Current State of Industry “Distributed Enterprise Edge Security”

- Client Security Investment at Edge
- IDS, Firewalls, Anti-Virus, Anti-SPAM Deployed by Customer
- Inefficient, Expensive, Non-Holistic
- Repetitive Across Client Base

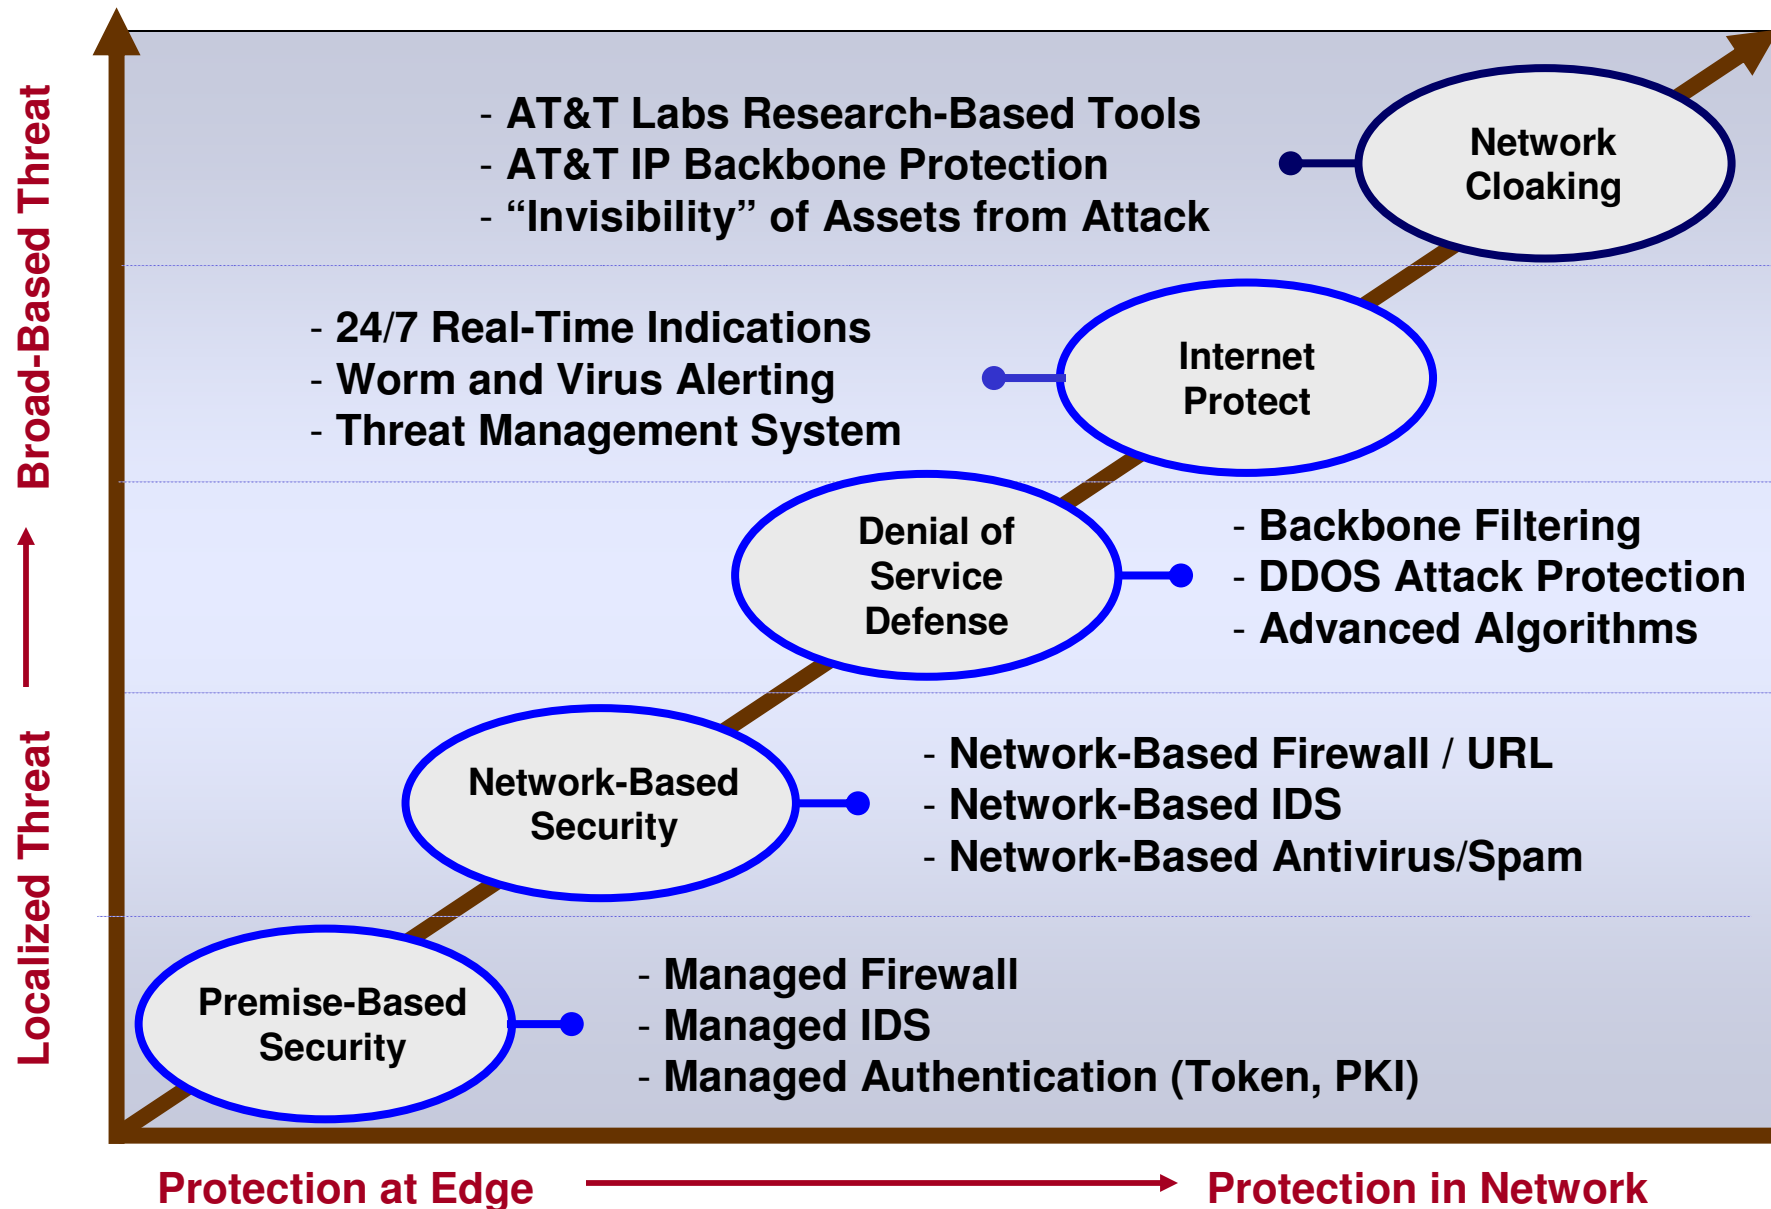

Network “Intelligence and Security”

- Network-Based Solutions
- Efficient, Inexpensive, Holistic
- Non-Repetitive Across Client Base
- Total Cost of Ownership (TCO) Improvement

CHALLENGE: Industry-wide Convergence Toward Network-based Solutions
